- 1 Lots of good feedback in office hours.

- 5 Always makes herself available to us. Constantly explains topics again to make sure everyone has understood.

Q: What specific change in the use of active learning would help your learning?

- 1 A lot of the time she answers her own questions and doesn't ask the class. But also the class wasn't that active so I understand why.
- 2 Although the simulation was very beneficial to understanding topics, I think we could have done some more collaboration throughout the course
- 3 I think fewer rhetorical or obvious questions should be asked of students to avoid awkward silences. We all know the answer so it just feels like a silly waste of energy to answer "what an engineer makes".

- 2 Nothing needs help in my opinion.
- 3 This ECON class was great!
- 4 I felt it was a well structured and informed course, only negative was it being an 8:30 class
- 5 I feel like all of these were present in this course and didn't need improvement.
- 6 Very well designed. Very well taught. One of the best classes I've ever had. Good mix of challenging and instructive

Q: Was the course too hard or too easy? What specific change related to the level of challenge would help your learning?

1 I thought that this course was fairly easy. Many of the topics covered I already learned in some 400 level econ courses. I think the main issue was the order I took classes not as much the class.

Q: What else would you like to say about your learning experience in the course? Please avoid personal comments about the instructor.

- 1 I thought this course was very well done and enjoyable to take. While I did find the content easy I still found class engaging and interesting. My main critique is that annotated lecture slides were never released which ended up with me rewatching class lectures in order to find 1 slide worth of information.
